

BORE THUNDER™

37MM/40MM

LAUNCHER ADAPTER

The Bore Thunder™ Launcher Adapter is a reusable carrier that is designed to allow the deployment of the powerful Bore Thunder™ 12ga cartridge from a 37mm or 40mm less-lethal launcher.

The Bore Thunder™ Adapter provides an officer the ability to deploy a strong and effective distraction or diversion, with zero risk of throwback.

The ALS Bore Thunder™ Adapter uses the same technology found in the TRMR-LE™ which restricts the deployment of a standard, lethal 12ga round in the heat of the moment.

The Bore Thunder™ 12ga cartridge produces a forceful 172 dB, along with flash and overpressure.

Custom marking is available on request.

Part No. Description

ALS1208A	37/40mm Bore Thunder™ Launcher Adapter
